Future of Jobs

In the new world, it is not the big fish which eats the small fish

It is the FAST fish which eats the slow fish

By Klaus Schwab, Founder and Executive Chairman of the World Economic Forum

GPT-3.5 GPT-4

ChatGPT

Examples	Capabilities	Limitations
"Explain quantum computing in simple terms" →	Remembers what user said earlier in the conversation	May occasionally generate incorrect information
"Got any creative ideas for a 10 year old's birthday?" →	Allows user to provide follow-up corrections	May occasionally produce harmful instructions or biased content
"How do I make an HTTP request in Javascript?" →	Trained to decline inappropriate requests	Limited knowledge of world and events after 2021

- Business development professionals
- Project managers
- Sales & marketing professionals

~74k 👤

👤 Workers currently in these jobs

Source: WEF's Future of Jobs survey of 80 companies employing ~50k workers in SG.

SKILLS IN SG

- Top three skills: **Cognitive skills (e.g. analytical thinking, creative thinking), self-efficacy and technology skills**

Impact of Technology on Mature Workers

- Countries that **age** tend to be countries that **automate more**
- Singapore has a 54% risk of automation to older workers
- **Older, low skilled** workers face **threat** from automation

Debunk the Myth

While resistance to technology adoption and training may be from mature staff and younger staff are generally more receptive to technology, resistance towards technology stems from **apprehension towards handling new technology**, and the **lack of awareness of digital trends rather than age**.

There are mature workers who look forward to adoption of more technology and are keen to learn new skills.

2 MATURE WORKERS ACCEPTING TRAINING OPPORTUNITIES

Mature workers in Singapore appear **highly motivated** to receive training; nearly

9 in 10 have accepted the opportunity to participate.

Acceptance rates remain high among older workers, with higher acceptance rates among those with **post-secondary education**.

Mature worker with positive mindset

*“I am **open if the company is to adopt new technology**. I believe that the company would adopt something that is beneficial in the direction that the company wants, I would try my best to learn.”*

– Mature worker of 1st gen family business

Mature worker who are resistant towards training

*“Older workers like us can go for as many training to be caught up on the current trends, however, we would **not be able to be as efficient and capable as the experts in the field**.”*

– Mature worker of 2nd / 3rd gen family business

Training for Mature Workers

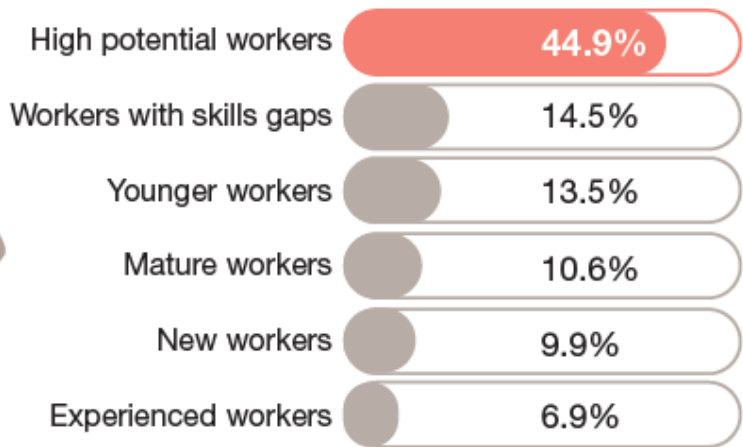

MATURE WORKERS RECEIVING TRAINING OPPORTUNITIES

51% invited to participate in training in the past five years.

69% with post-secondary education are more than twice as likely as those with primary or no formal education (34%) to have been invited to training.

Top group of workers to send for training

Percentage may not add up to 100% due to rounding

Barriers to Training Faced by Mature Workers

High cost
of training

Conflict
with current
work commitment

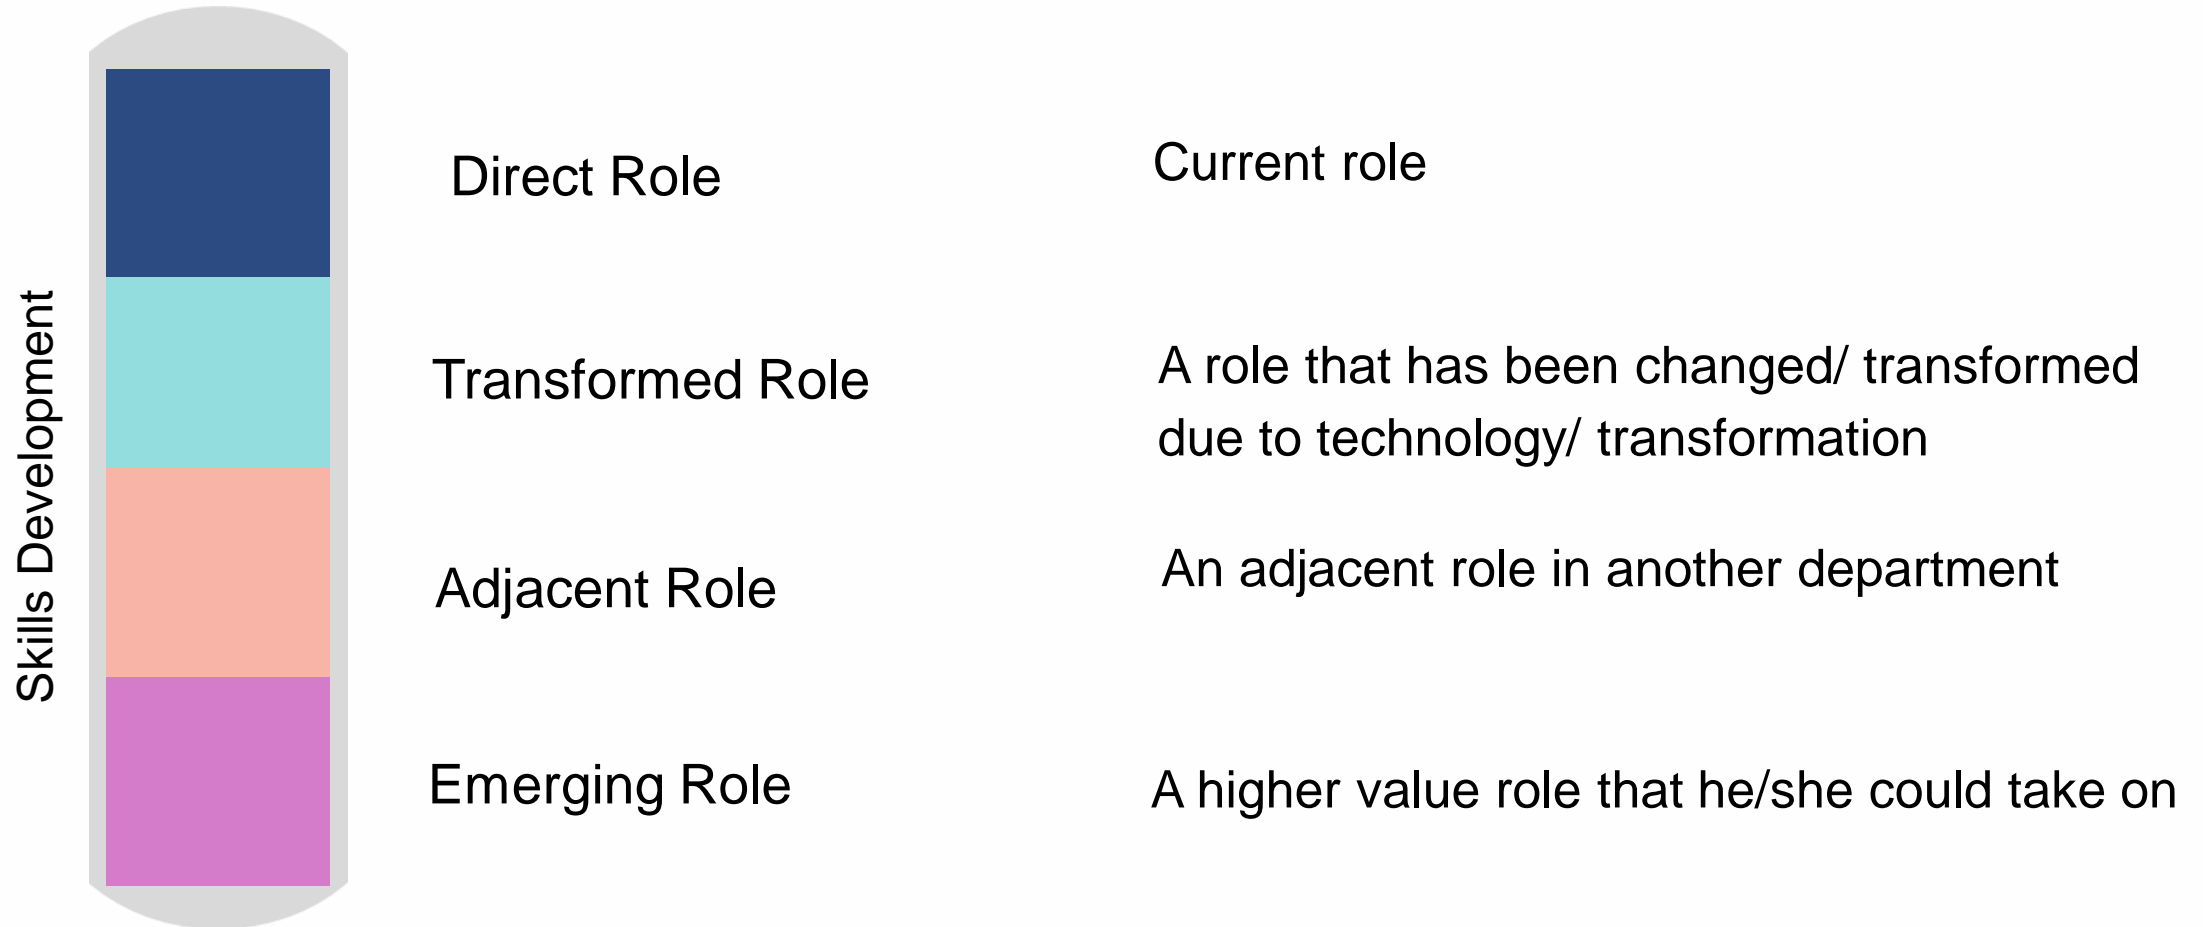

Case Study

- Grown from a one-man garage guni to waste management giant
- Company training committee: Bring together unions and management to develop transformation plans to ensure the workforce remains future-ready, relevant, and resilient
- Innovative approaches to training and learning

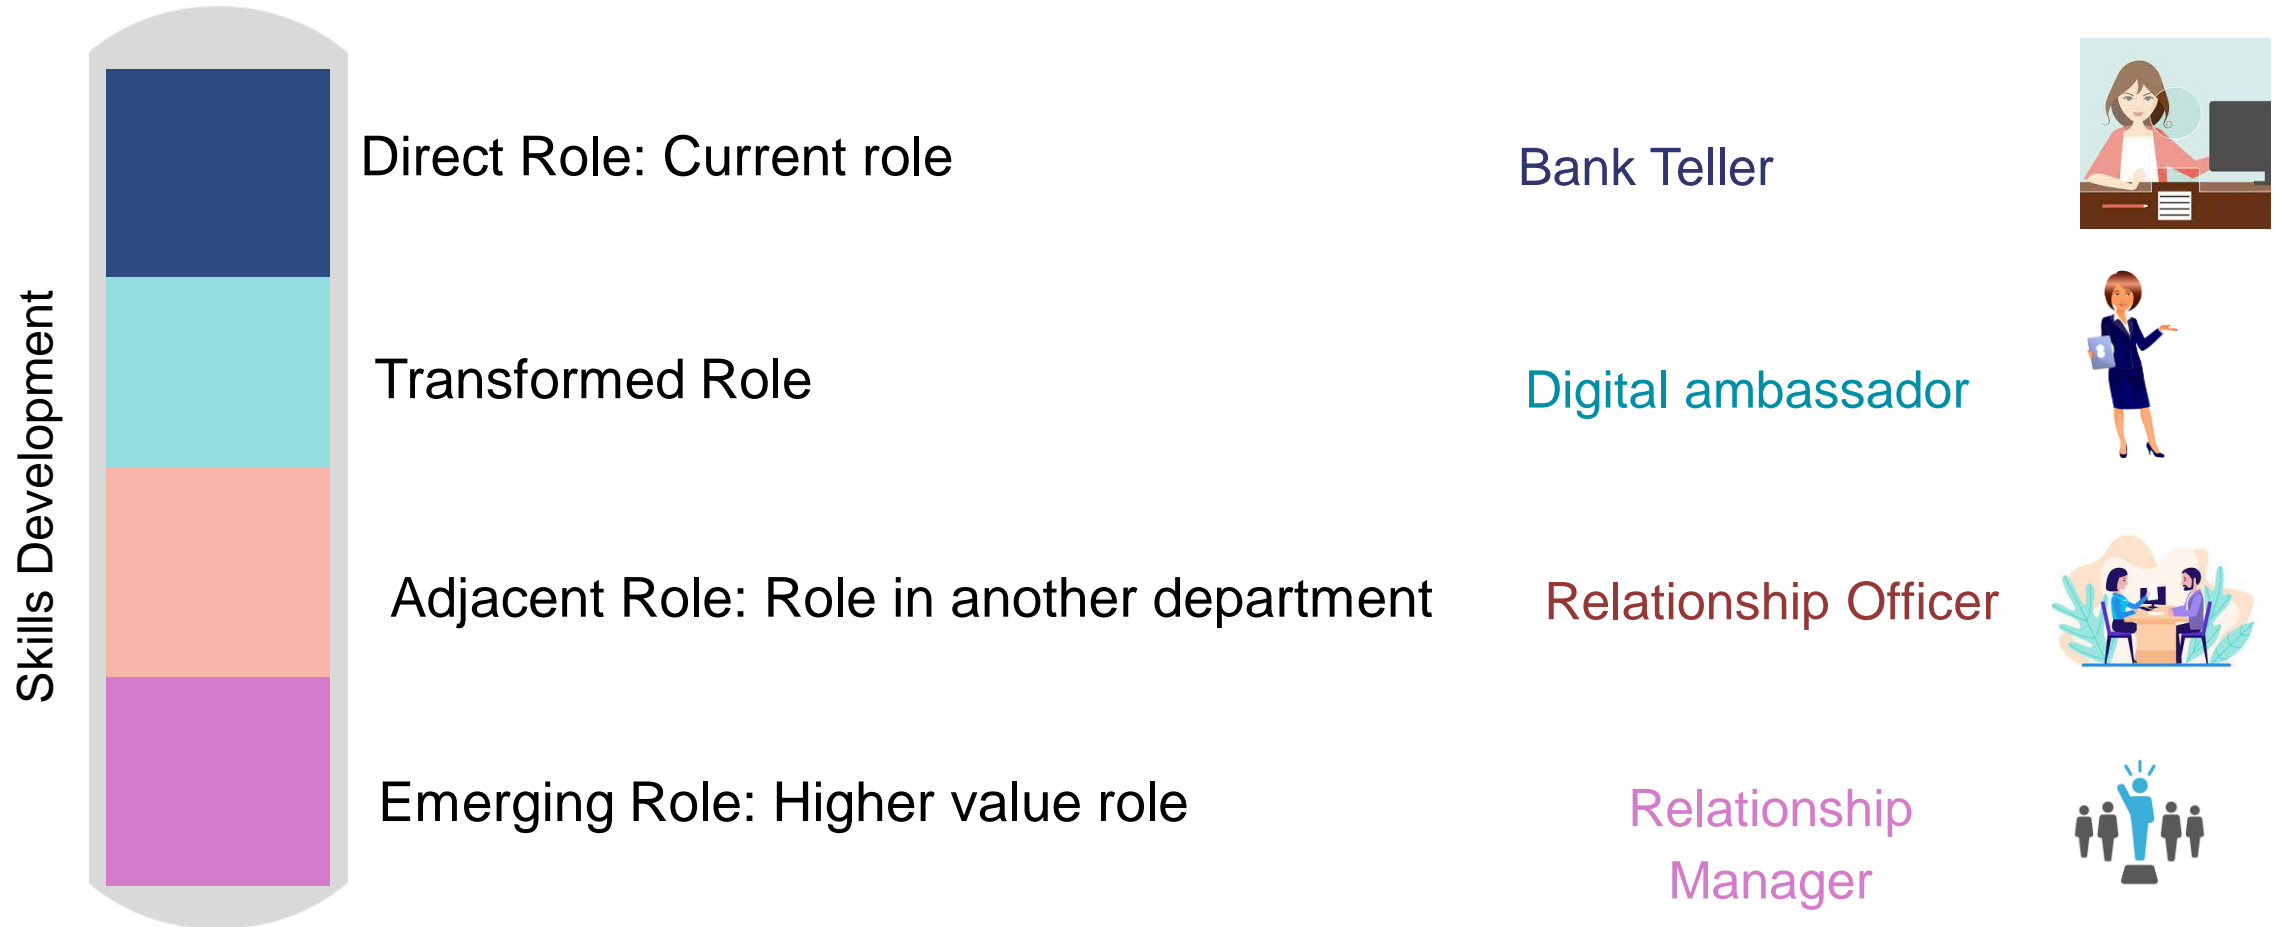

How to enhance skills development of mature workers

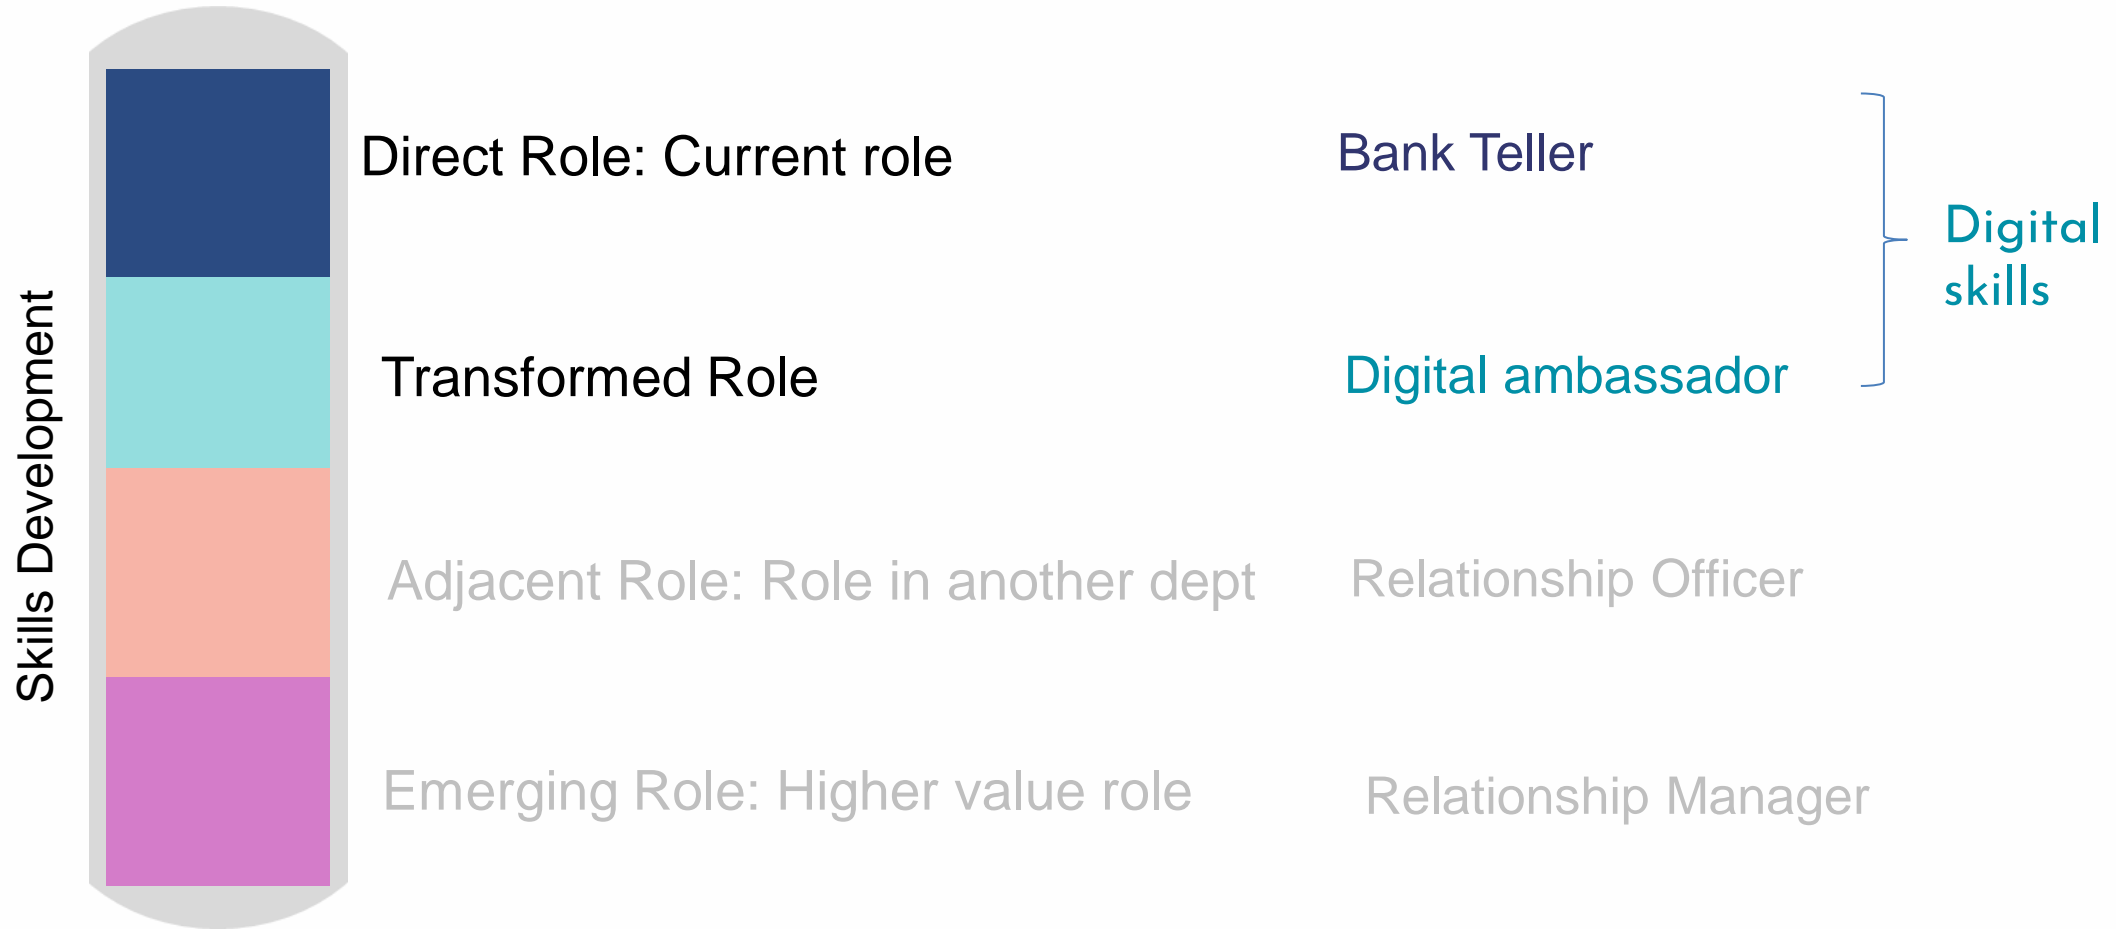

Multi Vitamin Strategy for Skills Development: Multiple Pathways

Multi Vitamin Strategy for Skills Development: Multiple Pathways
